

Amendment to the Specification

Please replace full paragraph 6 on page 11 of the specification, published as paragraph [0071], with the following amended paragraph:

On the left side of **Figure 5** one can see the “static representation” **501** of the instrument. This representation excludes the laid out event streams. On the right side of **Figure 5** one can see some examples of financial event streams **502**, **503**, etc. that could have been created via the event extraction process, forming a timeline of inter-related event objects that is specific to the given static representation. This is the canonical “event representation” of the instrument.
